DG visit

Dir PR, Arjun Dalal reports

DG Subodh Joshi visited our club officially on 26-3-2016. it was a very memorable visit both for us and him. Our cultural team had organised the entire event with a theme. He was welcomed by our Anns with traditional Arati.

The packed meeting started with the national anthem. After lighting of the traditional lamp the president read her report. The new Paul Harris fellows were felicitated and certificates were handed over to them by our DG.

The DG took over the meeting and addressed the august audience very differently. he stated that in order to 'impress', one usually speaks in English. But if one wishes to truly express himself, then his mother tongue is the only answer. Hence he kicked off his address in Marathi to a thunderous applause!! This also happened to go well with our Maharashtrian theme!

DG Subodh impressed the audience with his own learning from his own experience as a Rotarian serving at various posts. He rightly advised that the presidential year is like a bouquet of fresh flowers and it is the job of the president to pass on this bouquet in a fresh state. Thereafter the DG enumerated various examples from Ramayana and Mahabharata to make his point. He further stated that if he has to appreciate our club achievements then it would take at least 2 meetings!

This was indeed a feather in our cap!

His interaction with all the directors and chairpersons of our club has boosted our confidence.

3 new members were inducted into our club. PE Rtn Shubhangi gave the vote of thanks.

The meeting ended graciously with a recital of Pasayadaan..

Maharashtrian night finds our lovely ladies in traditional finery!

Our heartfelt condolences to Ann Jyotsna Shahakar on the demise of her dear father

MATERNAL AND CHILD HEALTH

CHILD HEALTH CARE

TAKE ACTION

Develop or support programs that **provide immunizations and antibiotics**. Measles, malaria, pneumonia, AIDS, and diarrheal diseases are the leading causes of death in children under five.

6.3 million children

under the age of five die each year from diseases, malnutrition, poor health care, and inadequate sanitation.

TAKE ACTION

Prevent mother-to-infant HIV transmission by encouraging the use of antiretroviral drugs and formula feeding.

TAKE ACTION

Include water, sanitation, and hygiene efforts to maximize child nutrition. Diarrheal diseases caused by contaminated water exacerbate malnutrition in children.

Promote good nutrition, including encouraging breastfeeding for most infants.

Dr Devdhar and Dr Mate being felicitated on the important roles they are taking up in IMA

Happy Birthday!
